Claim Rejections - 35 U.S.C. § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 9-10, 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Mouchi. Mouchi discloses a base 22 including a first channel having an opening at one end of the base. A second channel 26' extends away from the first channel and has an opening at an end opposite the first channel. An adaptor portion 1 extends from the base and encloses at least a part of the second channel. At least one conductive contact member (8 and 9) is insertable within the first channel member and second channel. A retention piece (the protrusions in the channel which holds contacts 8 and 9 and wires 23-25) is insertable within the second channel and is configured to retain the conductive contact member within the first channel and second channel.

Allowable Subject Matter

3. Claims 6-8, 11-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2875

Claims 19-26 are allowable.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Seelbach et al, Shen and Gabrius all disclose light fixtures similar to applicant's invention.
